**4** To reconstitute the metocean conditions prevailing during a shipwreck

# Be efficient Take no risk!

# WHAT WE DELIVER

Marine weather for professionals

**A user-friendly web platform**  
delivering professional weather data

**A rolling 5 day weather forecast**  
to anticipate the extreme conditions to be avoided

**A Probability of occurrence of rogue waves**  
and dangerous sea states

**A possible reconstitution of a particular day**  
on precise coordinates

**A Statistical treatment over 20 years**  
of hindcast data to determine the odds to find extreme weather on your customers' routes

- To **understand better the general weather system** surrounding your vessels
- To have an informed discussion with your customers
- To **avoid losing vessels** because of the weather conditions
- To **prevent losing part** of the cargo/containers
- To challenge the captains' log books
- To **save big money** through a reduced accident rate
